

MUHAMMAD ARSALAN

IT SUPPORT SPECIALIST | HELP DESK | DESKTOP SUPPORT | IT OPERATIONS

Riyadh, Saudi Arabia | +966 59 519 0098 | m.arslanrafaqat@gmail.com
Portfolio: [muhammadarslan11.github.io](https://github.com/muhammadarslan11) | LinkedIn: [linkedin.com/in/muhammadarslan33](https://www.linkedin.com/in/muhammadarslan33)

PROFESSIONAL SUMMARY

IT Support professional experienced in Level 1 and Level 2 end-user support across Windows and macOS environments. Skilled in Active Directory administration, Microsoft 365 and Outlook support, hardware and software troubleshooting, printers and peripherals, Windows Server fundamentals, DNS, DHCP, TCP/IP, VPN, Group Policy, remote support, and technical documentation. Currently a Technical Data Officer in Saudi aviation, applying accuracy, cross-functional coordination, and structured records management. Master of Computer Science with ongoing hands-on IT support labs and web-based troubleshooting projects.

TECHNICAL SKILLS

End-User Support: Level 1 & 2 Support, Help Desk, Desktop Support, Hardware & Software Troubleshooting, Printers & Peripherals

Microsoft & Operating Systems: Windows 10/11, Windows Server, macOS, Linux, Microsoft 365 / Office 365, Outlook, Teams

Identity & Administration: Active Directory, Organizational Units (OUs), Password Resets, User Access, Group Policy

Networking: TCP/IP, DNS, DHCP, VPN, Wi-Fi, LAN Connectivity, Network Troubleshooting

ITSM & Remote Support: ServiceNow, Jira Service Management, Remote Desktop, TeamViewer, AnyDesk

Virtualization & Labs: VirtualBox, Cisco Packet Tracer, Wireshark, Windows Server Lab Environment

AI-Supported Workflows: Generative AI, ChatGPT, Microsoft Copilot, Prompt Engineering, AI-Assisted Troubleshooting and Documentation

PROFESSIONAL EXPERIENCE

Technical Data Officer

Alpha Star Aviation Services | Riyadh, Saudi Arabia | Jan 2025 - Present

- Maintain accurate aircraft technical records, work orders, maintenance documentation, and controlled hard-copy and digital files.
- Update aircraft, engine, and APU flight hours and cycles, checking entries for accuracy and consistency.
- Use CAMP and TRAX to manage aviation technical data, planning records, and documentation workflows.
- Maintain engine and APU oil-trending records to support reliable tracking of operational data.
- Coordinate with Planning, Production, and Line Maintenance teams to resolve documentation gaps and keep records current.
- Prepare and issue Work Orders and SMRFs in support of maintenance and operational requirements.
- Use AI tools for data organization, document preparation, and structured analysis, validating every output against source records.

IT Support Officer

Technic Mentor Soft Solution | Pakistan | Dec 2023 - Jun 2024

- Delivered onsite and remote Level 1 and Level 2 support for Windows and macOS users.
- Diagnosed hardware, software, operating system, printer, peripheral, and connectivity issues and guided users through resolution.
- Installed, configured, and maintained desktops, laptops, business applications, printers, and peripherals.
- Administered Active Directory accounts, password resets, user access, Organizational Units, and basic Group Policy settings.
- Supported Microsoft 365 applications, including Outlook, and resolved common email and productivity issues.
- Performed basic Windows Server and network troubleshooting across DNS, DHCP, TCP/IP, VPN, Wi-Fi, and LAN connectivity.
- Used Remote Desktop, TeamViewer, and AnyDesk for remote troubleshooting; documented actions and user guidance.

ICT

The City School - Paragon Campus | Pakistan | Dec 2022 - Sep 2023

- Delivered ICT lessons in Microsoft Office, HTML/CSS, computing fundamentals, and basic programming concepts.
- Resolved classroom technology issues and explained solutions through clear, step-by-step guidance.

ICT

IISAT | Pakistan | Jan 2021 - Nov 2022

- Delivered ICT instruction, managed classroom equipment, and supported technology-based learning activities.
- Maintained student records and provided practical support for routine computer and software use.
- Conducted hands-on computer lab sessions and guided students in using software applications and digital tools effectively.
- Supported students with troubleshooting common computer, software, and connectivity issues during lab sessions.

ONGOING PROJECTS

AI IT Support Assistant - Stage 1

Portfolio Project | Ongoing

- Developing a browser-based troubleshooting assistant covering Windows, networking, Active Directory, DNS/DHCP, printers, Outlook, VPN, hardware, and software issues.
- Designing guided flows around problem identification, evidence collection, diagnosis, corrective action, verification, and escalation instead of simple keyword-only responses.
- Creating diagnostic questions and scenario-based pathways that help users narrow likely causes and avoid repeating completed troubleshooting steps.
- Building the interface and troubleshooting logic with HTML, CSS, and JavaScript, using AI-assisted coding workflows to support prototyping and iteration.
- Adding structured troubleshooting-report and browser-based PDF export functionality to capture symptoms, actions taken, outcomes, and escalation details

IT Support Home Lab

Personal Project | Ongoing

- Building a virtual support environment with VirtualBox, Windows Server, and Windows client systems to practice administration and troubleshooting safely.
- Configuring a Windows domain environment and practicing Active Directory user, group, and OU management, password resets, access support, and basic Group Policy.
- Working through DNS, DHCP, TCP/IP, domain connectivity, Windows networking, and common end-user support scenarios using a structured diagnose-test-verify approach.
- Using Cisco Packet Tracer and Wireshark to practice network design fundamentals, connectivity testing, packet inspection, and fault isolation.

Academy OS - IT Support Learning Platform

Personal Project | Ongoing | GitHub Pages

- Applying AI-assisted development and prompt-driven prototyping to explore layouts, refine content structure, and accelerate iteration while reviewing and validating the final implementation.
- Designing the content model so learning material can remain organized, reusable, and easier to expand as additional courses and technical topics are added.

Academy OS is a learning platform that helps users learn step by step based on their current knowledge and career goals. Unlike normal course platforms that only provide videos, lessons, and completion progress, Academy OS helps users understand what they should learn first, what skills they are missing, where they are weak, and what they should learn next. It can include different academies such as IT Support, Networking, Cloud, Cybersecurity, and AI. Each academy can have topics, practical labs, quizzes, troubleshooting exercises, interview questions, and real-world practice. Academy OS also includes features like Learning GPS to show the best learning path, Stuck Detection to find where a learner is having problems, Learning Memory to track what they have learned, a Knowledge Vault to save useful notes and commands, Focus Mode to help users study without distractions, and Career Mode to compare their skills with job requirements. The main goal of Academy OS is not only to complete courses, but to help users build real skills, improve practical knowledge, prepare for interviews, and become ready for real jobs.

EDUCATION

Master of Computer Science | Superior University, Pakistan | 2022 | GPA: 3.23/4.00

Diploma in Graphic Designing | Muslim Hands College of Computer Science, Pakistan | 2015

CERTIFICATIONS & TRAINING
